Summary

Computer Science graduate and Python Developer specializing in software development across domains such as automobile, retail, and consulting. Experienced in building scalable applications, API development, debugging, database management, and full SDLC execution. Skilled in Python, Django, SQL (PostgreSQL/MySQL), REST API integration, and performance optimization. Demonstrated ability in developing production-grade features, offering technical support, resolving issues, and maintaining version-controlled codebases. Known for delivering customer-centric software solutions backed by strong testing, documentation, and continuous improvement practices. Proficient with JSON formatting, Microsoft Excel, and developing web services and data vectors. Adept at addressing OS-level performance challenges with hands-on experience in Linux, IIS, and PowerShell for deployment, monitoring, automation, and enhancement of application reliability. Possessing strong communication skills, I thrive in cross-functional teams, ensuring customer satisfaction through creative problem-solving and strategic management consultative approaches.

Education

Ramrao Adik Institute of Technology, D. Y. Patil Deemed to be University <i>B.Tech in Computer Engineering (Minor: Data Science), CGPA: 8.12/10</i>	July 2022 – July 2026 <i>Navi Mumbai, India</i>
New Horizon Public School <i>12th Grade, Percentage: 68%</i>	May 2020 – July 2022 <i>Navi Mumbai, India</i>
New Horizon Public School <i>10th Grade, Percentage: 87.4%</i>	May 2007 – April 2020 <i>Navi Mumbai, India</i>

Experience

Next24tech Technology & Services (Remote) <i>Java Developer Intern</i>	July 2024 – September 2024
- Developed a resume builder with export templates used by 100+ users, an encrypted live chat application, and a data visualization tool leveraging table structures to streamline data flow (500+ entries). Implemented application server architecture using UNIX and Shell Scripting, with batch file processing for automated conversions and integrations. - Followed Agile methodologies with Jira, focusing on scalable design, debugging, maintenance, and deployment using Java, Eclipse, and Electron. Ensured adherence to JUnit-based testing, code reviews, and model enhancement for performance improvement in analyst workflows. Supported technical implementation, user training, and process optimization for Sales & Distribution operations, including CAPEX analysis for budgeting and compensation modeling.	
SkillCraft Technology (Remote) <i>Machine Learning Intern</i>	September 2024 – October 2024
- Built supervised deep learning models (85% accuracy) using scikit-learn and pandas for employee benefits analytics, along with unsupervised clustering techniques to enhance product development pipelines and support market expansion initiatives in Indonesia. - Developed a feature engineering pipeline reducing test time by 40%, integrated MySQL-based workflows for optimized data handling, consumer product analysis, and PL/SQL-backed classification tasks. Monitored performance metrics and provided technical support for user-feedback driven improvements.	

Projects

TextTrinity: Unified NLP Platform <i>Python, Django, REST APIs, PostgreSQL</i>	Nov 2024 – Feb 2025
- Developed a full-stack NLP platform using Python and Django, integrating summarization, keyword extraction, and text-processing modules through REST APIs. - Implemented PostgreSQL-optimized workflows reducing query latency by 35% and enabling reliable processing for 50+ concurrent users. - Managed debugging, feature upgrades, requirement fulfillment, API documentation, and version control for smooth deployment. Applied mounting strategies and stakeholder collaboration for enhancing application capability.	
Offline Document Intelligence System <i>Python, Django, FAISS, SQL</i>	May 2025 – July 2025
- Built a secure offline document-processing system capable of parsing and indexing PDF/DOCX/TXT formats with Django backend services. - Integrated FAISS for semantic search and optimized SQL-based pipelines achieving 42ms retrieval time on 10K+ documents, including improvements for window-level user interaction. - Handled debugging, exception management, SSL certificate updates, and SDLC-compliant structured documentation for reliability and security.	

- Engineered a real-time analytics dashboard using a Django backend and REST APIs, supporting secure data ingestion from XLSX/CSV and ERP-style flat-file formats.
- Integrated MS SQL with optimized CRUD operations and role-based access control, improving data throughput and system reliability.
- Implemented logging, debugging tools, documentation, and FTP/SFTP-based data synchronization to support enterprise-grade deployments and monitoring standards.

Technical Skills & Certifications

Languages: Python, Java, JavaScript, HTML/CSS, SQL	AWS: AWS Cloud Practitioner Course (via GeeksforGeeks)
Frameworks & Libraries: React, Flask, FastAPI, TensorFlow, scikit-learn, spaCy, PyTorch	Microsoft: Build a Computer Vision App with Azure Cognitive Services, Azure AI Essentials Professional Certificate
Tools & Platforms: Git, Docker, FAISS, Hugging Face, VS Code	ServiceNow: IT Leadership Professional Certificate
Core Competencies: Data Structures & Algorithms, Distributed Systems, OS, Relational Databases	Alteryx: Designer Core Micro-Credential
	Cisco Networking Academy: Data Analytics Essentials Certificate (Jun 2025)

Leadership

ISTE-RAIT	July 2025 – Present
<i>Treasurer</i>	<i>Navi Mumbai, India</i>
- Overseeing financial planning, budgeting, and fund allocation for ISTE activities to ensure transparent resource management. - Coordinating with faculty, sponsors, and stakeholders for smooth execution of workshops, hackathons, and technical events across banking, R&D, BFSI. - Facilitating collaboration and knowledge-sharing through cross-domain events, supporting organizational operations and student development.	

Extracurricular

EduSkills TECH CAMP	October 2024
<i>Alteryx Data Analytics Workshop, EduSkills Foundation</i>	
- Engineered end-to-end automated data workflows using Alteryx, covering data cleansing, ETL pipelines, and performance optimization while following clean coding practices. - Converted raw datasets into actionable insights via dashboards for real-world business cases, demonstrating strong analytical and presentation skills. - Participated in a research project with a pharmaceutical partner (e.g., Pfizer) to interpret data insights and ensure compliance with industry regulations. - Worked in a lab environment applying data-integrity principles and best practices, focusing on industrialization and regulatory adherence.
