Summary

Aspiring AI Programming Specialist Intern candidate with solid backgrounds in Software Engineering, Java, Databases, and Computer Science basics. Proficient in constructing enterprise-level systems with Java/J2EE, SQL, and full-stack data engineering frameworks. Experienced in digital solutions, SDLC, debugging and test-driven development (TDD), and practical experience in microservices, data wrangling, database optimization, distributed systems, and solution architecture. Experienced with emerging technology, customer relationship management techniques, and customer relationship management reports interpretation. Motivate and lead teams by leveraging my strong technical knowledge and problem-solving abilities, recognized with ISTE Treasurer position. Accountable for the financial planning and execution of events in the banking as well as core banking initiatives. Enjoys the development of polished, scalable solutions to challenging problems and mentoring fellow team members, using Angular and middleware to create customer-facing software solutions, and implementing Project Management practice knowledge. Dedicated to accountability and affordability of project deliverables, and a detail-focused approach to technical documentation, logical reasoning, data processing, and test planning. Knowledge sharing is integral to my approach, enhancing both team and personal growth. Passionate about innovations and technology consulting in the context of global challenges.

Education

Ramrao Adik Institute of Technology, D. Y. Patil Deemed to be University <i>B.Tech in Computer Engineering (Minor: Data Science), CGPA: 8.12/10</i>	July 2022 – July 2026 <i>Navi Mumbai, India</i>
New Horizon Public School <i>12th Grade, Percentage: 68%</i>	May 2020 – July 2022 <i>Navi Mumbai, India</i>
New Horizon Public School <i>10th Grade, Percentage: 87.4%</i>	May 2007 – April 2020 <i>Navi Mumbai, India</i>

Experience

Next24tech Technology & Services (Remote) <i>Java Developer Intern</i>	July 2024 – September 2024
- Developed a resume builder with export templates (100+ users), an encrypted live chat app, and a data visualization tool (500+ entries) while implementing application server architecture for efficiency using UNIX and Shell Scripting in a UNIX environment. - Applied Agile methodologies and code review processes with Jira, focusing on scalable design, debugging, maintenance, and deployment using Java, Eclipse, and Electron, ensuring adherence to test case development and Junit implementation. Collaborate with team members on model development to enhance application performance, particularly in the context of automation and system efficiency.	
SkillCraft Technology (Remote) <i>Machine Learning Intern</i>	September 2024 – October 2024
- Built supervised deep learning models (85% accuracy) using scikit-learn and pandas in the context of employee benefits analytics and unsupervised learning techniques. - Created a feature engineering pipeline reducing test time by 40%, integrated with MySQL for optimized data handling, data wrangling, information technology solutions, while applying PL/SQL for data processes and classification tasks.	

Projects

TextTrinity: Unified NLP Platform <i>Python, Flask, spaCy, Transformers</i>	Nov 2024 – Feb 2025
- Built a multi-modal NLP pipeline integrating summarization, data-driven keyword extraction, and text-to-speech with a focus on computer vision in processing visual data. - Reduced latency by 35% using quantization and database optimizations, while ensuring data integrity and regulatory standards. - Delivered Flask REST APIs (50+ concurrent users) backed by PostgreSQL, optimized for new trend frameworks, demonstrating a clear vision towards innovative solutions and ensuring competency in the integration of Weblogic.	
Offline Document Intelligence System <i>Python, FAISS, Hugging Face, Quantization</i>	May 2025 – July 2025
- Developed a retrieval-augmented generation pipeline with FAISS, achieving 42ms latency on 10K+ documents. - Built a document querying tool for PDF/DOCX/TXT files with robust error handling, ensuring compliance with data integrity and regulatory standards. - Enhanced workflows through unit tests, agile sprints, and mentoring peers on prioritization and reasoning in a business domain context, applying accountability to project management and actively assisting others, especially in applying mathematic concepts to optimize results.	

- Designed a desktop-based system for managing books, users, and transactions with Oracle SQL backend, incorporating JMS for messaging services and SOAP for communication, ensuring a user-friendly UI experience.
- Implemented JDBC connectivity for CRUD operations and optimized SQL queries using Release Notes as documentation, facilitating efficient test planning and adherence to standards as part of software engineering practice.
- Added role-based access (Admin/Student) with secure login and input validation via SAML for authentication. Technical Skills Certifications

Technical Skills & Certifications

Languages: Python, Java, JavaScript, HTML/CSS, SQL	AWS: AWS Cloud Practitioner Course (via GeeksforGeeks)
Frameworks & Libraries: React, Flask, FastAPI, Tensor-Flow, scikit-learn, spaCy, PyTorch	Microsoft: Build a Computer Vision App with Azure Cog- nitive Services, Azure AI Essentials Professional Certificate
Tools & Platforms: Git, Docker, FAISS, Hugging Face, VS Code	ServiceNow: IT Leadership Professional Certificate
Core Competencies: Data Structures & Algorithms, Dis-tributed Systems, OS, Relational Databases	Alteryx: Designer Core Micro-Credential
	Cisco Networking Academy: Data Analytics Essentials Certificate (Jun 2025)

Leadership

Technical Head

Navi Mumbai, India

- Planned and hosted organized and supervised workshops, coding competitions, and technical events, led a group of 30 members to coordinate and conduct activities, focusing on budgeting, organizing logistics, and meeting deadlines, tutorials, and liaising with faculty and industry sponsors; showcasing my commitment to coaching and professional conduct while innovating e-business opportunities.
- Conducted regular one-on-ones to foster team development and provide feedback, ensuring consistent alignment with product management goals through effective communication and clarification of tasks, while assisting team members in scheduling and task prioritization, investigating areas for leaves when necessary.

Extracurricular

Alteryx Data Analytics Workshop, EduSkills Foundation

- Engineered end-to-end data solutions using Alteryx exclusively, developing automated workflows for data cleansing, ETL processes, and pipeline optimization while emphasizing clean coding and review practices.
- Transformed raw datasets into actionable insights through interactive dashboards for real-world business case studies, demonstrating ability in writing technical methodologies and hosting presentations, showing my creativity, innovative approach to problem-solving, and capability as a role model for peers and new members.
- Participated in a research project exploring the applications of data analytics in pharmaceuticals, collaborating with a local pharmaceutical company like Pfizer to interpret and present findings to stakeholders, emphasizing the role of chemistry in data solutions and compliance with relevant legislation.
- Worked extensively in a laboratory setting to apply principles of data integrity while ensuring adherence to best practices and regulatory compliance in projects.

Hobbies

Programming, Chess, Reading, Gaming, Badminton
